Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Election/Restrictions***

1. Claims 3,7,9-13,15,21,23,29 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 6.
2. Applicant's election without traverse of species III (Figs. 11-14) in Paper No. 6 is acknowledged.

***Specification***

OK  
The specification is objected to as failing to provide clear support for the claim terminology. 37 CFR § 1.75(d)(1) requires that terms and phrases used in the claims find clear support or antecedent basis in the description so that the meaning of the terms in the claims may be ascertainable by reference to the description. Specifically, the term and/or phrase "means to determine the initial position" and "means to determine the final position" do not appear in the specification.

***Claim Rejections - 35 USC § 112***

OK  
Claims 1,2,4-6,8,14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, the phrase "means to determine the initial position" and "means to determine the final position" is unclear and indefinite since it is not clear if applicant is trying to invoke 112, 6<sup>th</sup> paragraph.

A claim limitation will be interpreted to invoke 35 U.S.C. 112, sixth paragraph if it meets the following 3-prong analysis:

- (A) the claim limitations must use the phrase "means for" or "step for";
- (B) the "means for" or "step for" must be modified by functional language; and
- (C) the phrase "means for" or "step for" must not be modified by structure, material or acts for achieving the specified function. Applicant fails to have the first two steps of the 3-prong analysis.

Moreover, applicant's specification does not adequately describe the corresponding structure, material, or acts necessary to support a claim limitation which invokes 35 USC 112, sixth paragraph and therefore it is unclear what structure such language encompasses.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3728

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-2,16,17,22,24,25,30 are rejected under 35 U.S.C. 102(b) as being anticipated by US 5974700 (Kelly).

Kelly teaches a combination of a shoe stud and a receptacle substantially as claimed including the shoe stud (figures 1-2) having a threaded spigot (12) with a multi-start thread (see col. 3, lines 25-30) wherein the spigot has a helical keyway (the groove between the threads) and the receptacle (figures 3-4) having a multi-start screw thread socket has a helical key (18) corresponding to the helical keyway of the stud, the stud and the receptacle having equivalent locking means (post 34,42 and teeth 26) and the stud and receptacle having means to determine the initial position of the stud relative to the receptacle, and means to determine the final position of the stud relative to the receptacle (when one of the three threads of the receptacle contact one of the three grooves of the receptacle this is the initial position, when the spigot is fully rotated then this is the final position). Note: the “means to determine” the “initial position” and the “final position” is not invoking 112, 6<sup>th</sup> paragraph since the proper format is not being used.

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 4-6,8,14,18,19,20,26-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kelly '700 in view of US 3911600 (Dassler).

Kelly teaches a stud and receptacle substantially as claimed (see the rejection above) except for one of the threads being enlarged and a corresponding enlarged groove. Dassler teaches a thread of the stud having an enlarged thread (4) and the receptacle having a correspondingly enlarged groove (8). It would have been obvious to provide one of the thread and one of the grooves of Kelly with an enlarged thread and an enlarged groove, respectively, as taught by Dassler, to further secure the stud and the receptacle together.

*Conclusion*

**Applicant is duly reminded that a complete response must satisfy the requirements of 37 C.F. R. 1.111. Moreover, "The prompt development of a clear issue requires that the replies of the applicant meet the objections to and rejections of the claims. Applicant should also specifically point out the support for any amendments made to the disclosure. See MPEP 2163.06" MPEP 714.02. The "disclosure" includes the claims, the specification and the drawings.**

7. Telephone inquiries regarding the status of applications or other general questions, by persons entitled to the information, "should be directed to the group clerical personnel and not to the examiners. In as much as the official records and applications are located in the clerical section of the examining groups, the clerical personnel can readily provide status information without contacting the examiners", M.P.E.P. 203.08. The Group clerical receptionist number is (703) 308-1148.
